

The Thread *GUARD*TM

Plastic Drums or Tote Bungholes getting stripped?
Keep 'em Clean & Clear with the ThreadGuard!

Absolute Protection for Plastic Bungholes and Plastic Bung Threaded Equipment

2" NPT Fine, or Buttress Coarse Thread Guards

- **Stops container and equipment failure losses**
- **Prevents downtime due to equipment breakdown**
- **Reduces cross-threading and mounting time**
- **Protects any 2" NPT plastic threaded containers**
- **Easily mounts in 2" Npt or Buttress bungholes**
- **Hex feature permits easy tightening in bunghole**
- **Offered in plated steel and 316 stainless steel**

Thread*GUARD*TM Benefits & Features

- ◆ **Save Containers...** Stop drum or IBC losses because of stripped-worn-destroyed bungholes!
- ◆ **Save Money...** helps prevent equipment cross-threading or thread stripping when mounting in 2" NPT or Buttress bung holes on drums, totes, tanks and other containers or equipment.
- ◆ **Save Maintenance...** stops continual thread-wear of sensitive plastic threads due to vibration, constant use and transfer between steel, stainless steel and plastic bung holes.
- ◆ **Save Down-time...** prolongs the working life of all plastic equipment including: pumps, bung taps and spouts, depth gauges, filters, funnels & other plastic threaded equipment.
- ◆ **Easy to Use...** permits easier mounting, with quick steel-to-steel or plastic thread alignment.
- ◆ **Extends Equipment Life...** bung equipment can be temporarily or permanently sealed in the Thread*GUARD*TM with a suitable thread sealant or, temporary or permanent adhesive.
- ◆ **Versatile...** suitable for most equipment applications covering a wide compatibility range.

Thread*GUARD*TM Available in Plated Steel and Stainless Steel
