

RinseTube™ for Drum Bung Entry Equipment

For Cleaning & Storing Bung Entry Pump Tubes, Mixers & Other Devices

Helps Ensure Operator & Environment Safety & Cleanliness

Now you can quickly and safely soak and clean bung entering industrial equipment, pump tubes, bung mixers, dip tubes and other bung process drum equipment more safely, thoroughly and much more quickly with the **DM-55MRT Rinse & Storage Tubes** (PVC or AL).

It minimizes solvent use and operator or environmental exposure to messy or hazardous material splashing. Rinse tube pays for itself while it reduces laborious cleaning time, lowers the risk of cross-contamination and ensures better Quality Control Management, minimizes waste, dripping and splashing.

(To prevent spillage and fume exposure when cleaning bung entry drum mixers, you can use the **DM-55SCC/MRT** fume containment cap shown below.)

Benefits

- ✓ Tubes hold most solvents and reduce cleaning time to the minimum
- ✓ Helps eliminate or reduce cross contamination between batch changes
- ✓ Minimise solvent use and dangerous fume exposure during clean up
- ✓ Multiple tube usage permits cleaning of a variety of liquid products
- ✓ Helps prevent liquid spillage and solvent waste during clean up
- ✓ Helps keep equipment clean between operations and for storage

Features

- * Quick-release bracket provides rapid solvent change & safe storage for bung entry tubes & equipment.
- * Wide FlareEntry™ funnel opening of tube permits rapid drum-to-tube loading with minimum dripping.
- * Available in PVC and Aluminum for a wide range of solvents and cleaners.

Specifications

Model No. DM-55MRT/PVC	MOC's: Tube, PVC, wall brackets, plated steel
Model No. DM-55MRT/AL	MOC's: Tube, aluminum, wall brackets, plated steel
Maximum equip. diameter:	1.80 inches (46.0 mm)
Internal tube diameter:	1.85 inches (47.0 mm)
Overall tube length:	35 inches (889 mm)
Tube solvent capacity:	Approximately 1.5 quarts

Clean Bung Entering Devices Quickly

Assembly & Operating Instructions

- 1) Mount **RinseTube™** firmly on surface capable of supporting total weight
- 2) Only use solvents that are **chemically compatible** with PVC or aluminum.
- 3) For flammable solvents always ground & bond all components by Safety Code.
- 4) For multiple tubes of different solvents, mark or color-code each tube clearly.
- 5) To load tube, remove tube, hold next to drum and lower equipment slowly in it.
- 6) Remount **RinseTube™** in wall bracket and secure wing-nuts firmly.
- 7) Soak and spin equipment by hand, move up and down, brush as needed.
- 8) Replace solvent whenever better cleaning effectiveness is required.
- 9) Dispose all solvents thoughtfully, according to Federal and OSHA regulations.
- 10) You can safely store any bung entry equipment in the **RinseTube™**.
- 11) **WARNING!** Check tightness of all brackets fittings regularly. **Max. Wt. 60 lbs.**
