

# Drum Base Dolly Heaters

## DM-55DBH Series • Thermostatic and Pulse Models

For non-flammable, non-hazardous, heat sensitive materials of all kinds  
Can heat a non-insulated 55 gallon drum of water to 168°F in about 12 hours.

The Model **DM-55DBH** Base Heater Series have a 900 lb. capacity designed to provide variable heat control for heating all kinds of non-flammable liquids in metal or plastic 55 gallon drums.

This base heater has fully mobile drum dolly function. It is an excellent for maintaining product heat at different levels for different applications. (Heater not intended for outdoor use.) Applications include but are not limited to thickness reduction for speedier product transfer, liquid protection against cold weather solidification or crystallization, faster process reactions and other processing tasks.

This heater makes a great companion with the DRUM-MATES® P# **DM-55DWH**, Full Wrap Drum Heater or P# **DM-55DBP** Insulation Blanket – when having shorter product heating cycles is required.

Base heater models come equipped with an aluminum platen encased heating element in either a 1,750 watt (at 120 volts) or a 1,920 watt (at 240 volts) output. The dolly rolls on 3" diameter steel swivel casters. A choice of heating methods give infinite variable temperature control with On/Off pulse action, or a thermostatically controlled continuous heat-up. The heater comes equipped with a 6 foot cord and high amperage three pin plug. When natural thermal convection circulation caused by heating a liquid does not provide enough product uniformity, DRUM-MATES® Hi-efficiency drum mixer P# **DM-55BAS** will maximize product blending and assist heat-up cycle quickness.

### HEATER SPECIFICATIONS *(Plastic drum base heaters available on request)*

**Model # DM-55DBH-120M, Metal** drum heater, 120 volt, 14.6 amp, 1750 watt,  
Maximum Heat, *Unloaded* - 600°F (Uses Hubbel single outlet #5361)

**Model # DM-55DBH-240M, Metal** drum heater, 240 volt, 8.0 amp, 1920 watt,  
Maximum Heat, *Unloaded* - 680°F (Uses Hubbel single outlet #5661)

Dolly Diameter: ..... Outside: 28.5", Inside: 24.0"  
Shipping Weight: ..... 60 lbs.
