

# Drum Wrap Heater

*Super Efficiency for Quicker, More Uniform Drum Heating*

## *Wrap-Around Style Drum Heater*

The DRUM-MATES® Drum Wrap Heater is designed to provide a safe, practical, efficient means of freeze protection, viscosity control and materials maintenance at elevated temperatures. A built-in adjustable thermostat prevents runaway temperature elevation. For use indoors only.

### Benefits & Features

- Fast and Easy to Use
- Uniform Full-Drum Heating
- One or Two Separate Heat Zones
- Both Heats and Insulates – Low Watt Density
- Wind Resistant Full Drum Coverage
- Simple One-Step VELCRO® Installation
- Adjustable EZ-Set Digital Controller, 50-450° F (10-232°C)
- Patented Ground Heating Element for your Safety
- Dielectric Strength over 2000 Volts
- ¼", ½" or 1" glass fiber insulation layer available
- For Undercover Use (Minimal Weather Exposure)
- 120VAC/1PH-1440 Watt or 240VAC/1PH-2880 Watt
- Long 6 foot (1.8 M) Power Cord
- Available for use with plastic drums at 160F, 750 Watts
- Dimensions: Length: 70", (1778 mm), Height: 33.75" (857 mm)

**DM-55DWH Drum Wrap Heater**  
with full wrap, draft-proof insulation

**DM-55DBH Optional Base Heater**  
Use it for even Quicker Heating Time!

### Optional Accessories

**Insulating Cap**, P# DM-55DLC, drum lid insulation cap (non-heated)

**Base Heater**, DM-55DBH/MS, metal drum base heater, Max. 250\*
