With FREE insulated drum-top cover, and EasyMount Belt Closure

**Model No. DM-55DPB/2W**, Drum Protection Blanket, double wall  
With FREE insulated drum-top cover, and EasyMount Belt Closure

This super-strong, heavy duty insulating blanket with durable vinyl outer jacket is for protecting standard 55 gallon (210 liter) metal or plastic drums of any liquid. The blanket prevents the cooling of heated drums and saves energy. The **HeatSaver™** helps keep your drum at the temperature you prefer much better if sheltered from cold weather, and when used in conjunction with the appropriate drum heater. The integral insulating layer helps direct the existing heat energy almost entirely inward toward the drum's contents. The wrap may not fit over all drum cartridge or band heaters due to components attached to the heater element. Maximum drum wrap circumference is about \_\_\_ inches.

### Help Prevent Loss of Drum Heat Energy!

#### Now with **EasyMount™** Wrap Closure

The **EasyMount™** belt closure provides easy, trouble-free, mounting and easy dismounting from drum-to-drum. It quickly, cinches straps up for maximum tightness to the drum wall reducing the possibility of thermal loss. This durable, light weight, insulated covering is ideal for both indoor and outdoor (under shelter) use.
