

Tote Mixer Safety & Maintenance Accessories

Safety, Mounting & Maintenance Accessories for DRUM-MATES® IBC Mixers

Using these Safety, Mounting and Maintenance Accessories you can improve quality control and extend the applications range of the "DM-600 Series" high efficiency IBC mixers.

Accessories like the **DM-600EEA** Muffler Extension are also designed to protect liquids sensitive to moisture or atmospheric contaminants. For better quality control review the DRUM-MATES® IBC mixer and mixer drive data sheets and the DRUM-MATES® TQMixing™ Guidelines.

Equipment Operation Accessories

IBC ClampLock™ for mounting on mesh or tubular frames

The ClampLock™ attaches and locks onto the IBC stand clamp foot pads, ensuring a safe grip on open mesh or tubular IBC frames to prevent stand movement or damage to the IBC.

Part. No. DM-600WIB

Muffler Extension, prevents air exhaust contamination through tote opening

The ½" NPT flexible exhaust extension prevents moisture emissions contamination through the filling opening by off-setting the muffler 20 inches away from the mixer drive.

Part. No. DM-600EEA

Round Tank Brackets, converts IBC tank stand for mounting on round tanks

2 per set, with supplied fasteners. Zinc Plated

Part No. DM-600RTA

Tote Filler Series, Quick Liquid Transfer Assembly for bulk or ingredeient filling or IBC's

Options include: alternative sizes, quick disssconnects, vertical alignment, discharge assembly

Part No. DM-600TFA Series

Recommended Maintenance Components

FRL Assembly, treats air to minimize moisture and give best air drive function

De-waters, decontaminates, regulates pressure and lubricates with an oil fog. Recommended for lowest maintenance and best longevity. Air motors operated without an FRL are subject to warranty limitations. Read the DRUM-MATES® leaflet, "Is Your Air Drive FRL Protected?"

Part No. DM-55FRL (for 3/4 & 1.5 Hp) or **DM-600FRL** (for 4 Hp)

Motor Service Kit, minimizes maintenance downtime

Helps fulfill air drive maintenance requirements. Saves costly downtime by preventing crisis management. It includes vanes, seals, gaskets, springs, muffler element and all other components needed for a regular service, or a complete motor rebuild.

Part No. DM-200ADA/SK, DM-400ADA/SK or DM-600ADA/SK

More IBC Mixing Equipment Accessories

Product No.	Description
DM-166GWK	Explosion Proofing grounding wire kit for mixing in flammable environment, set of 4 cables
DM-55SCC/SD2	Fume & splash containment SplashCap™ for 2" NPT bungholes, with ½" or 5/8" shaft opening
DM-55BCF	ThreadConverters™ - convert Buttress or Mauser coarse threads or Cam-Lock to 2" NPT threads
DM-600BBK	Fume BarrierBlanket™ kit, protects operator and equipment with a Teflon FilmWrap™ kit
