

DM-600XDM, Xtreme Duty IBC Mixer

For Mixing Compounds with Extreme Characteristics

High Mixer Power & Blade Proximity to IBC Wall Provides Excellent Agitation

For most high viscosity (very thick) and high specific gravity (dense) compounds

For most slurries or compounds with high stratifying (layering) or sedimenting conditions

Suitable for blending in 275 gallon, 330 or 500 gallon IBC's or tanks with minimum 36" width.

**Easily enters and withdraws
from most industrial IBC's (totes)
with a 6" or greater port opening.**
